

Low Profile 'U' Shaped Lift Table

It is designed to be used with EURO-pallets (800 x 1200mm) or other pallets of similar sides and with an open bottom to allow a pallet truck to be removed.

The scissor lift helps to eliminate stress and prevent injury from constant back strain. The pallet is raised or lowered on the scissor lift so that top of load is always at an ergonomic height.

Table powered by 50Hz/3 phase mains

Capacity	1000kg
Lowered height	85mm
Raised height	660mm
Platform size	1420 x 1140mm
Power pack	0.75kw
Lifting cycle	18secs
Size of 'U'	1050 x 585mm
Ref	2544w
