

Low Profile Lift Table with Ramp

It is designed for CHEP/GKN pallets (1100 x 1200mm) and will also work well with EURO-pallets (800 x 1200mm)

The ramp enables pallets to be placed directly onto the platform using a manual or electric pallet truck. The pallet can then be raised to a working height, helping to eliminate back strain and thus contributing to a safer working environment.

Remote power pack with pedestal and controls

Table powered by 50Hz/3 phase mains

Capacity	1000kg
Lowered height	85mm
Raised height	860mm
Platform size	1450 x 1140mm
Power pack	0.75kw
Lifting Time	18secs
Lifting speed with load	42mm/sec
Lowering speed with load	48mm/sec
Size of ramp	1140 x 890mm
Type	2546w
