

# Insulated Drum Jackets

Drum Size	Type
25L	<b>2172w</b>
50L	<b>2173w</b>
105L	<b>2174w</b>
200L	<b>2175w</b>

This insulated jacket is a unique product, designed for insulation applications and maintaining container temperatures.

The Jacket is the only unheated jacket which offers and provides a cost effective method of minimising heat loss from pre-heated containers and their contents.

The Jacket is lightweight and easy to fit with a top flap which allows for the contents of the drum or IBC to be poured.

When used in conjunction with the Drum Base Heater, heating times are shorter and therefore energy costs are reduced.

Following the material being heated, the Jacket can be fitted, preventing or reducing temperature loss

## **Construction**

High performance polyester blanket insulation contained within layers of flame retardant polyester give the jacket a durable and industrial feel.

Manufactured with easy to fit Velcro fixing strips or easy release buckles depending on the jacket size and a moveable flap for ease of access, the jacket is the most simple and effective way of keeping your products warm.

**Jacket Material:** Flame retardant polyester fabric

**Insulation:** Polyester Fibre

**Fixing Drum Variations:** Velcro. Easy release buckles.

**Tolerances:** Suitable for use up to 90°C (high temperature versions available upon request)
