

Pallet Trucks with Adjustable Forks

Ideal pallet truck for use with more than one pallet size or for unique applications.

A revolutionary hand pallet truck design - with adjustable forks.

- Move all your pallets with one pallet truck instead of two or even three!
- Ideal for applications where more than one type of pallet is used
- Great for special/unusual sized pallets thanks to "infinite" adjustment
- Available in three fork lengths and two fork width ranges
- Width of each fork: 150mm
- Polyurethane wheels fitted as standard
- Supplied with single load rollers, tandem available at extra cost.

The same truck and same pallet

Before adjustment

After adjustment

The 76mm lowered height makes this pallet truck a "semi-low profile" pallet truck. This allows it to fit into many special lower pallets, for example those coming from the US or the Far East.

Capacity	Fork height	Fork width	Fork length	Type
2200kg	76mm to 196mm	400-520mm overall	900mm	7156
			1050mm	7157
			1150mm	7158
		530-680mm overall	900mm	7159
			1050mm	7160
			1150mm	7161

Optional Extra

Tandem polyurethane rollers
