

'V' Blade Push Along Snow Plough

Designed to remove snow while keeping your body in an upright walking position, instead of relying on the strength of your lower back, you can use your body weight, legs and arms.

Minimises work by pushing instead of lifting and throwing with the angled plough allowing snow to easily slide off either side of the blade.

Manufactured from mild steel with high quality epoxy coated finish, making this a high quality and hard wearing product.

TYPE	7676
Blade height	165mm
Handle height	1110mm
Handle width	410mm
Overall blade width	900mm
Wheels	160mm dia solid rubber with roller bearings
