

Skid Lifters with Removable Platform

Skid lifters are high lift pallet trucks with scissor action.

Unlike regular high lifters they can be moved around when raised which makes them ideal for use in manufacturing and packaging environments.

Our skid lifters are also supplied with a removable platform so the machine doubles up as a scissor lift table.

FEATURES AND BENEFITS:

- Raise pallets or platform to correct working height to minimise back strain
- Combination of pallet truck and lift table
- Fully welded heavy duty steel frame
- Easy to use control lever & total stop brake on castor wheel
- Foot operated pedal for easier and faster lifting
